## Hard Drive & Configuration Protection

CompuGuard Cornerstone is software designed to maintain the integrity of your computer's critical configuration settings. Cornerstone insulates the hard drive with a protective security coating while establishing a temporary work space to record all changes. Upon reboot, these changes are instantly eliminated from the computer.

The outcome of this unique design is to provide:

- An unencumbered user experience
- Safe Internet travel
- Elimination of costly maintenance and re-imaging

Cornerstone's protective nature shields the computer against damage typically inflicted by user error, malicious intent, and malware such as Viruses, Trojans, Worms, Spyware, etc.

### CAN YOU IMAGINE...

- At least 80 to 90% fewer maintenance calls?
- 100% uptime?
- No negative consequences resulting from Spyware, Viruses, Malware or other tracking devices?
- Freedom to concentrate on tasks other than restoring your computer to a functional state?
- The ability to experiment without penalty or permanency?

### WHO NEEDS CORNERSTONE?

Corporations, Colleges, Universities, Schools, Libraries, Hotels, Internet Cafes, Government Agencies, Military Bases, Home Users, Training Centers, the US Olympic Committee and other organizations are successfully using "Instant Restore" technology from Centurion Technologies to eliminate maintenance cost, provide an unrestricted user experience, and establish a safe surfing environment free from sabotage and privacy intrusions.

### BUT I HAVE ANTIVIRUS, FIREWALL, SPYWARE DETECTOR, IMAGING & RESTORE SOFTWARE... WHY DO I NEED CORNERSTONE?

All these security packages and utilities are important, but no single application protects the computer from all computing dangers. This goal is most closely achieved with Cornerstone. Cornerstone write-protects the hard drive, eliminating the possibility of damage to the system and drive sectors. A simple reboot completely restores the computer to your safe configuration. There isn't a need to search, identify, filter and destroy. Simply reboot... and restore to "like new" condition.

### HOW CAN CORNERSTONE HELP MY ORGANIZATION?

Cornerstone...

- Makes unwanted changes temporary.
- Assures an operational computer for your users.
- Enables users to experiment without harm.
- Eliminates most maintenance issues saving significant time & expense.
- Protects from viruses even before antivirus companies are aware a virus exist (during the unprotected delta.)
- Enables safe surfing from Spyware and other Malware designed to intrude on your privacy, hijack your computer's operation, or steal valuable information from your workstations.
- Eliminates Spyware's grinding halt on your computer before it has the ability to infect your hard drive.
- Offers a small footprint and improved workstation performance.

### REBOOT & RESTORE TO YOUR SAFE CONFIGURATION!

### WHAT DANGERS CAN I AVOID WITH CORNERSTONE?

- Innocent mistakes or planned sabotage.
- Spyware clogging up hard drives and recording user activities & confidential information.
- Decreased slow-downs or improved performance resulting from flushed Malware.
- Hidden malicious code in seemingly legitimate web sites.
- Maintenance time to clean computers.
- Maintenance time to repair or re-image workstations.
- Data or Intellectual Asset theft.
- Lost productivity due to infection.

## Hard Drive & Configuration Protection

CompuGuard Cornerstone is the next generation hard drive and configuration protection product with advanced features and benefits beyond any other desktop security applications. Cornerstone protects your hard drive from permanent changes and restores your computer to the optimal configuration settings you have established.

Upon rebooting your computer, temporary changes are wiped free from your computer... eliminating all potentially harmful changes, costly maintenance, re-imaging efforts and providing safety from Viruses, Spyware and Malware.

### HOW DOES IT WORK?

Cornerstone write-protects the hard drive and records all changes to a temporary storage area. The computer behaves as if all changes are permanent providing a full user experience. However, upon reboot, all changes (actually written to a temporary scratch space) are wiped free from the computer instantly restoring your favored configuration.

### LEGEND FOR FEATURES

- ✦ Exceeds competitors performance or feature
- Equal to competitors performance or feature
- ✓ Exclusive Centurion feature

### CORNERSTONE FEATURES:

- ✦ **Easy Wizard Installation**— Standard install tool with intuitive setup providing simplified installation.
- ✦ **Command Line Installation**— Option for Administrators desiring to custom automate the install process.
- ✦ **Persistent Storage**—Mountable drive, recognized by the OS, where users can permanently direct or save applications, documents, e-mail, and more.
- ✦ **Partition based protection**— Hard drive protection providing the ability to enable or disable **“Instant Restore”** protection on a per partition basis
- ✦ **Password Authentication**— Identifies administrator's right to initiate enable or disable modes. One password can be used per client.
- ✦ **Custom Install**— Allows Administrators to “pre-configure” installation options and mass deploy these settings on multiple computers.
- ✓ **USB Blocking Control**— Administrator can choose to block portable data storage devices such as USB drives, cameras, data sticks, etc. from connecting to the machine
- ✓ **Stealth Mode Toggling**— Administrator is able to display or hide protective mode status.
- ✓ **Control Center Ready**— Cornerstone is able to accept advanced **remote management** commands from the CompuGuard Control Center (CCC) which is compatible with all Centurion products.

### COMPUGUARD CONTROL CENTER – ADVANCED CLIENT AND LICENSE MANAGEMENT CONSOLE

May be purchased separately to control all Centurion Technologies' hard drive protection products.

- ✦ **Grouping & Filtering**— Multiple clients can be filtered and grouped by specific criteria for easy management.
- ✦ **Scheduling**—Remotely schedule any task related to your Centurion protection. Schedules can apply to one, many or all clients.
- ✦ **Remote Execute** – Remotely and easily install 3<sup>rd</sup> party applications and updates on your CornerStone clients via the CCC (AV updates, OS updates, applications and more).
- ✦ **Broadcast Updates**— CornerStone updates can be broadcast and scheduled from Centurion's CCC eliminating individual updates.
- **Remote Shutdown & Wake On LAN**— Remote shutdown and “wake” of client machines.
- **Disable Keyboard and Mouse** – Administrators can disable as needed for maintenance, updates, etc.
